### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 2, 7, 14-22, 26, 28, 29, 33, 36-47 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by U. S. Patent No. 6,195,698 to Lillibridge et al.

As per claims 2, 28 and 29,, Lillibridge et al. disclose the limitations of these claims (see at least the abstract).

As per claims 7, 33, 36-39, Lillibridge et al. disclose said challenge includes prompting ......(col. 6, lines 50-57).

Art Unit: 2132

As per claims 14-21, 40-47, Lillibridge et al. disclose said response includes an answer ......(col. 6, lines 18-26).

As per claims 22 and 26, Lillibridge et al. also disclose these features (col. 7, lines 29-45).

### Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 3, 4 and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over, Lillibridge et al. as applied to claims 2 and 28 above, and further in view of the examiner taking official notice.

As per claims 3, 4 and 30, , Lillibridge et al. do not specifically disclose the \( \) limitations of these claims. The examiner, however, takes official notice that these elements are well known in the art of security systems. It would have been obvious to anyone having an ordinary level of skill in the art at the time the invention was made to have combined these well known features in applicants invention with the invention of Lillibridge et al. since they comprise very well known elements necessary for the entire system to function in a secure and controlled environment.

Art Unit: 2132

# Allowable Subject Matter

Claims 5, 6, 8-13, 23-25, 31, 32, 34, 35, 48-55 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas R. Peeso whose telephone number is 571 272-3809. The examiner can normally be reached on Mon.-Fri, 7:00 a.m. to 3:30 p.m. The central fax number for the office is 571 273-8300.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gilberto Barron, can be reached on 571 272-3799.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
